

Please avoid excessive vehicle idling - for our health, our planet, and your wallet!

THE PRICE OF A LITTLE IDLING COMFORT:

money out
the tailpipe,
energy wasted, CO₂
emitted, polluting
the air we
breathe.

JUST 10 SECONDS OF IDLING

wastes more
fuel than
shutting off

and restarting the
engine.

UPS PRACTICES A NO-IDLING POLICY,

saving \$\$\$ by shutting off
and restarting their engines
all day long. If they can do it,
so can you!

CHILDREN'S LUNGS

are still
developing, children
breathe at a faster rate
than adults, and stand lower
to tailpipe exhaust.

15 MINUTES OF PARKED IDLING

daily
at \$2.50 a gallon can cost
\$65 to more than \$200
annually, depending on
engine size.

VERMONT LAW

restricts
idling of all motor vehicles.
Also, if leaving a vehicle
unattended in public, it
must be shut off.

VEHICLE EXHAUST

contributes
to Vermont's
elevated
asthma
rate.

LIMIT WARM-UPS

generally to 30
seconds*, even in
cold weather; driving
gently is the best way to
warm up.

*check windshield defrosting
